

ABOUT ME

As a recent software engineering graduate with a passion for software development, I am excited to start my career as a Junior Software Developer. Throughout my academic journey, I have gained a strong foundation in programming languages such as Java, Python, and C++. I also have experience with database management, web development, and agile methodologies.

I am a highly motivated individual who thrives in a team-oriented environment. My strong communication skills, coupled with my ability to adapt to changing situations, make me an excellent collaborator. I am dedicated to providing innovative solutions to complex problems and continuously seek to expand my skill set through self-study and continuous learning.

My goal is to become a skilled software developer who can contribute to the growth and success of a dynamic organization. I am excited about the opportunity to work with experienced developers who can mentor me and help me grow in my career.

SKILLS

Programming Languages

C++, C, Python, Java, HTML, CSS, JavaScript

Frontend Frameworks

React, Angular, Bootstrap, Tailwindcss

Backend Frameworks

Django, Node, Express

Databases

MySQL, SQL Server, MongoDB

Mobile App Development

Dart, Flutter, Android

CERTIFICATES

- Full Stack Developer
- Advanced Web Development
- CISCO: CCNAv7(1) and CCNAv7(2)

EDUCATION

BSc. Software Engineering, Bahir Dar University

Oct 2018 – Aug 2022

Bahir Dar, Ethiopia

WORK EXPERIENCES

Junior Software Developer, Creavers Service PLC

Nov 2022 – present

Addis Ababa, Ethiopia

Web Developer Intern, ALA ICT Department

May 2021 – Aug 2021

Bahir Dar, Ethiopia

LANGUAGES

Amharic

English

PROJECTS

Hospital Management System

Nov 2022 – May 2023

A web-based application developed using Angular and Dotnet technologies. It is designed to streamline hospital operations by managing patient information, appointment scheduling, medical billing, electronic medical records (EMR), inventory management, pharmacy management, and more. The system provides real-time reporting and analytics on key hospital metrics, enabling hospital administrators to make informed decisions and improve hospital performance. The project leverages Angular for the front end, providing a responsive and user-friendly interface, and Dotnet for the back end, ensuring the system's scalability, security, and reliability.

Food Delivery App

Sep 2022 – Nov 2022

A mobile app developed using Flutter technology. It enables users to order food from their favorite restaurants, track their orders in real time, and make payments using various payment methods. The app provides a user-friendly interface, allowing customers to browse menus, customize their orders, and leave reviews and ratings. The system manages the entire food delivery process, from order placement to delivery, providing updates and notifications to users at every step. The project leverages Flutter's cross-platform capabilities, allowing it to be deployed on both Android and iOS devices, and providing a seamless and consistent user experience across platforms
